The Network EA is an advanced system that uses the power of artificial intelligence and neural networks to analyze macroeconomic data released during the news and make trading decisions based on them. The Expert Advisor uses the news to exit trading positions and therefore cannot be tested in the strategy tester.

1. After installing the EA, allow web request function by doing the following:
On your terminal go to “Tools”; “Options”; “Expert Advisors” and click on “Allow WebRequest for listed URL:”

Add and type in the following url links:

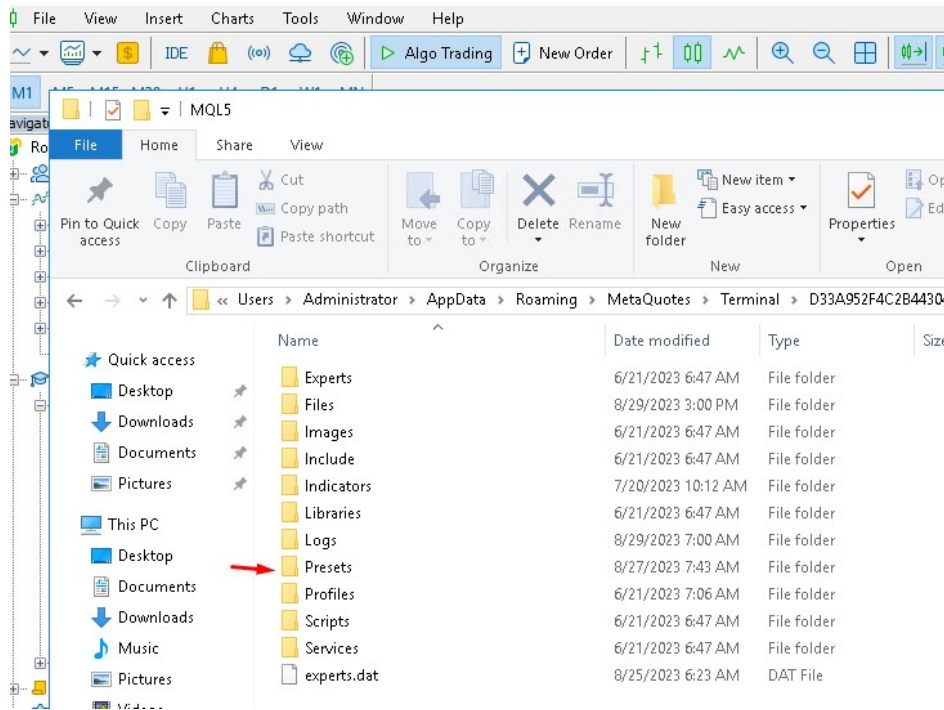

<https://ec.forexprostools.com>

<https://www.worldtimeserver.com>

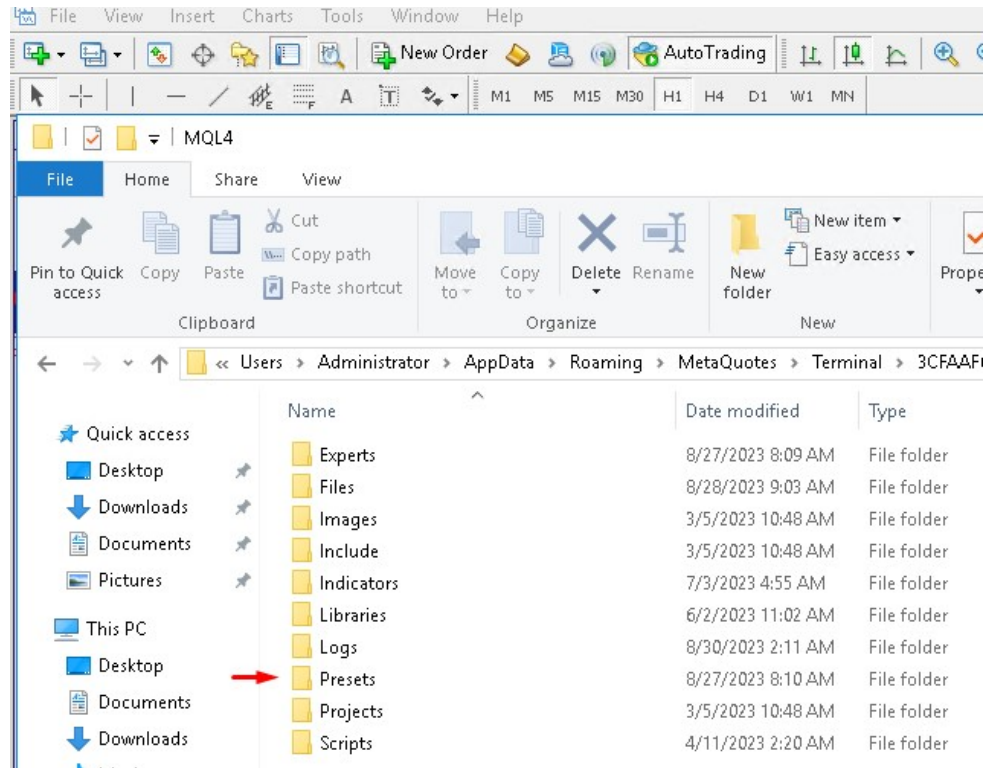

2. Install the set files:

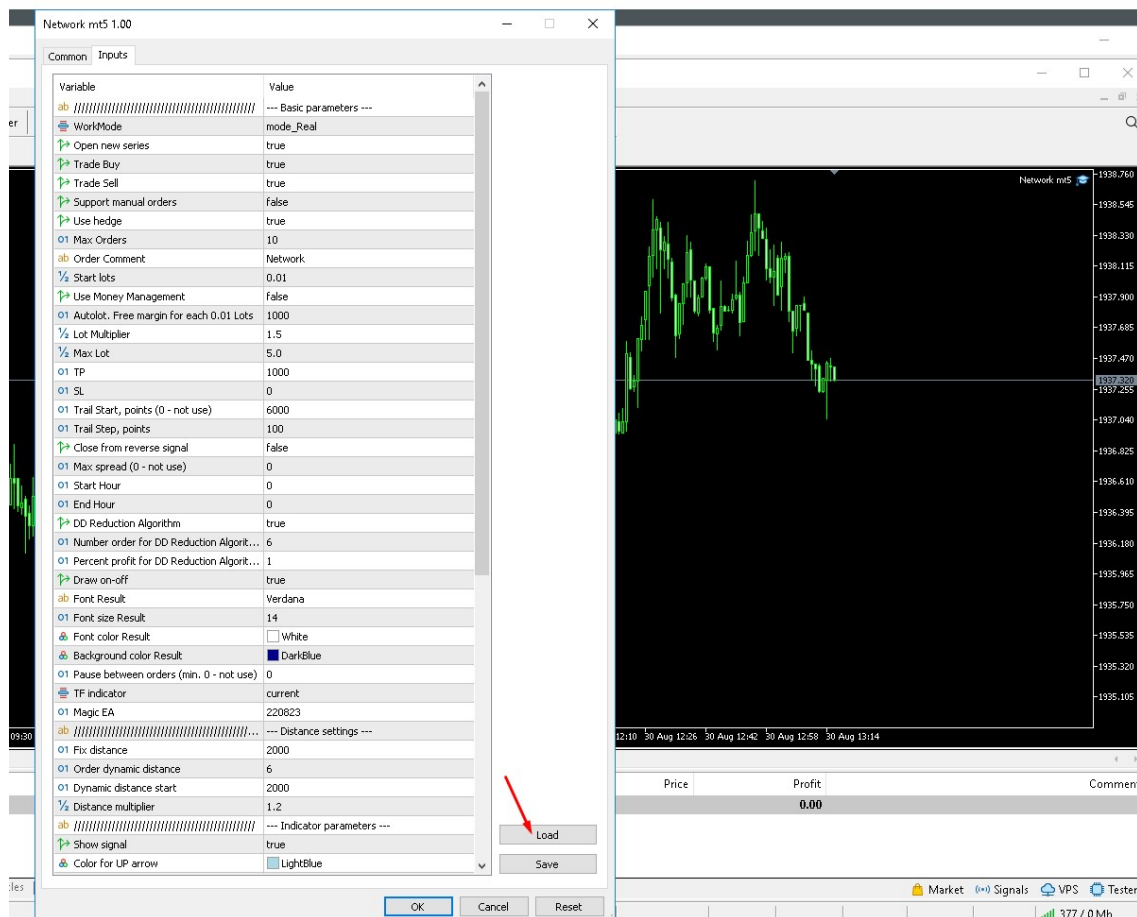

For Mt5: Go to “File”; “Open Data folder”; MQL5; “Presets” and drop your set files there

For Mt4: Go to “File”; “Open Data folder”; MQL4; “Presets” and drop your set files there

3. Load the set file by opening up the settings and click on “Load” and select the set file in the presets folder.
At the moment there are only 2 set files, one for xauusd on m1 chart and one for eurUSD on m1 chart

4. Make sure that “WorkMode” settings are **always** set to “mode_Real”. Never use “Mode_Test”. (“Mode Test” is used for strategy testing but will not work because the EA is using the news filer and cannot be back tested.)

The EA will draw a vertical line on the chart on the time that the news will be released!
