

ISABELLE MANUAL

Isabelle follows a smart hedging strategy by immediately placing a buy and sell order in the market. If the market starts to trend, for example upwards, the EA will follow the trend and will immediately open another buy order after hitting the TP while adding orders in a grid/martingale style in the opposite direction. The EA will always stay in the market in both directions and is effective in both ranging and trending markets. Isabelle can be used as a powerful tool by trend traders by using the panel on the chart and allowing the EA to keep on buying in an uptrend and to keep on selling in a down trend.

Web page with set files here: https://orangeforex.ru/?page_id=123

1. Recommended pairs:

If you want to run it on auto, use low volatile pairs that has a small daily range like: eurUSD; audCAD; eurGBP. If you want to use the EA as a tool in trend trading you can use it on any pair including gold.

2. Money Management:

Use at least \$3000 for recommended pairs if you do not control the direction according to trend. If you use a good indicator like Black Dragon to see trend, you can allow only buy or only sell according to trend and use less deposit. For gold you need to always follow the trend and may need more than 3000, depending on your accuracy. Isabelle works great on a cents account!

3. Settings:

- Open new series - on / off beginning of a new series of orders
- Trade Buy - allow the adviser to buy
- Trade Sell - allow the adviser to sell
- Enter right now – true/false -allow advisor to immediately start

- Pause between orders (min. 0 – not use) – time to pause between orders
- Fix distance - fixed distance between orders
- Order dynamic distance - from which order will the dynamic distance be applied in order
- Dynamic distance start - the starting value for the dynamic distance
- Distance multiplier - the dynamic distance multiplier

4. Using the News filter settings:

If you activate the setting: “Use News” – True, the EA will pause before the news announcement according to the settings

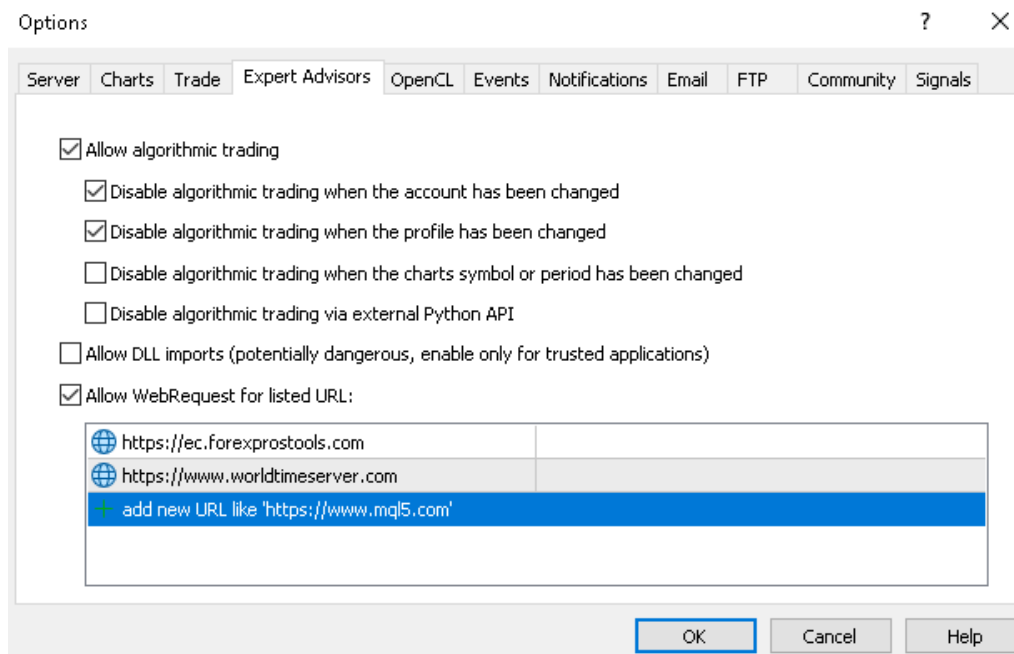

After installing the EA, allow web request function by doing the following:

On your terminal go to “Tools”; “Options”; “Expert Advisors” and click on “Allow WebRequest for listed URL:”

Add and type in the following url links:

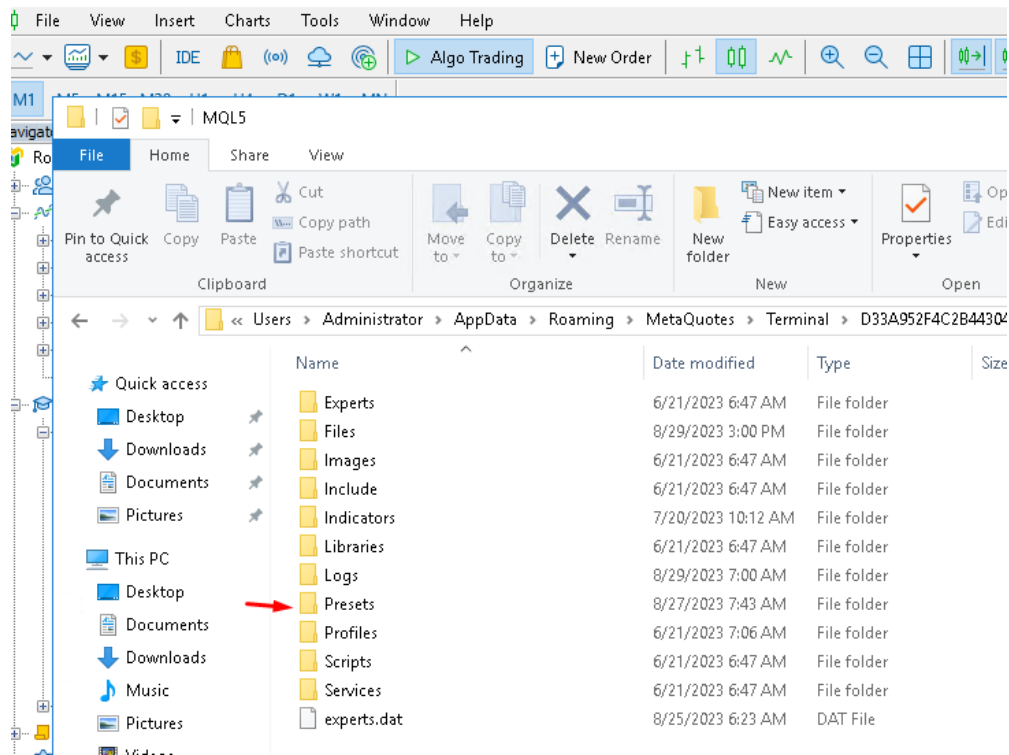

<https://ec.forexprostools.com>

<https://www.worldtimeserver.com>

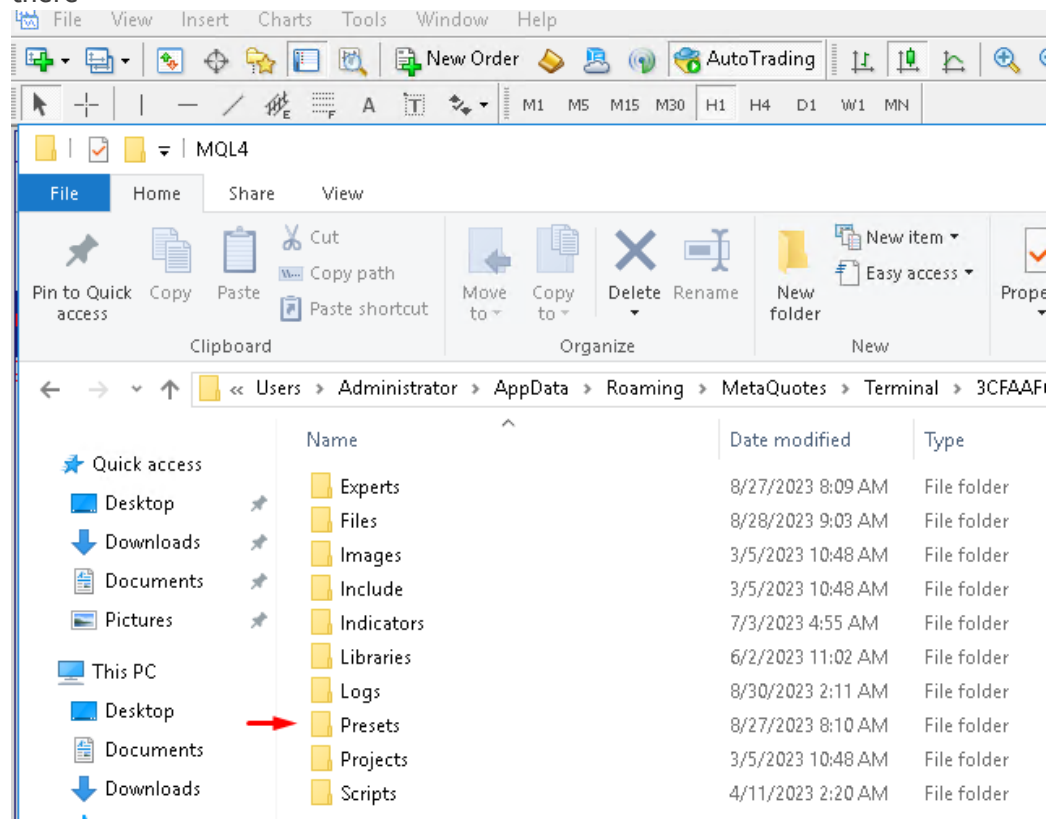

5. Install the set files:

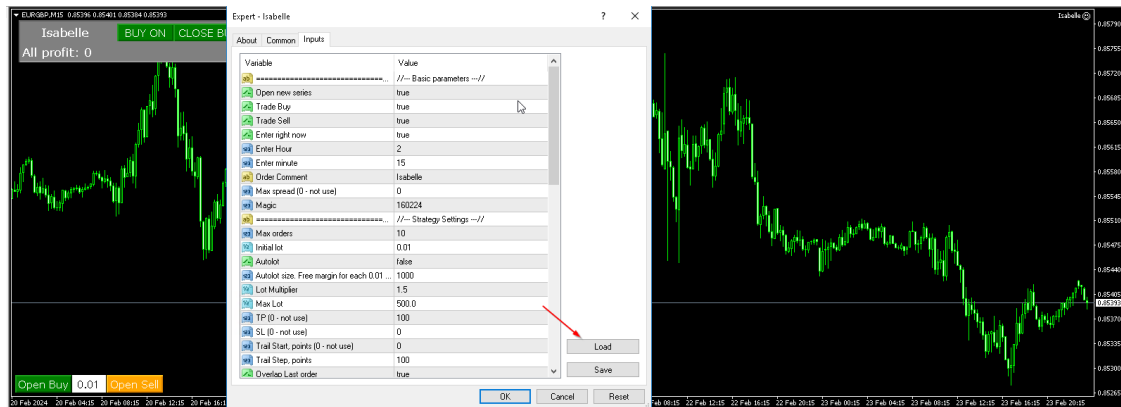

For Mt5: Go to “File”; “Open Data folder”; MQL5; “Presets” and drop your set files here

For Mt4: Go to “File”; “Open Data folder”; MQL4; “Presets” and drop your set files there

- Load the set file by opening up the settings and click on “Load” and select the set file in the presets folder.

7. ISABELLE: Functions of front panel on chart:

You can use the panel on the chart to trade with the trend and controlling the EA, we will explain the functions here:

	<p>“BUY OFF”: if you click this button and it switches to “BUY OFF” the EA will not allow buy orders in new cycle but the EA will still handle open buy orders or open new buy orders until it hits Take Profit of current cycle. After hitting profit it will not open a buy again.</p> <p>“SELL OFF”: if you click this button and it switches to “SELL OFF” the EA will not allow sell orders in new cycle but the EA will still handle open sell orders or open new sell orders until it hits Take Profit of current cycle. After hitting profit it will not open a sell again.</p>
	<p>“PAUSE ON”: if you click this green button and it switches to “PAUSE ON” buy positions will be paused and EA won’t add more until you click it again and it switches to “PAUSE OFF” then it will add buy positions again, the EA will always control the open trades.</p> <p>“PAUSE ON”: if you click this orange button and it switches to “PAUSE ON” sell positions will be paused and EA won’t add more until you click it again and it switches to “PAUSE OFF” then it will add sell positions again, the EA will always control the open trades.</p>
	<p>“NEW CYCLE” If you click on this button it will go red. If there are trades open the EA will still enter new orders until the current cycle of transactions are closed, after closing it, it will not open new orders again. You have to make it green again to start a new cycle.</p>

EXAMPLES OF TRADES

For gold controlling direction using BUY ON and SELL OFF in uptrend and vice versa in down trend is recommended!

Above is an example of trading Isabelle not using any indicator on gold

Above is an example of trading Isabella using the Black Dragon indicator to see the trend. This is a semi-manual way of staying in the trend and keep on selling in the red zone.

Risk Warning: Trading Forex involves significant risk and can result in the loss of your invested capital. You should not invest more than you can afford to lose and should ensure that you fully understand the risks involved. Trading leveraged products may not be suitable for all investors.
